Chapter 2

Installation

This chapter describes how to run the install program.

To install DragonUnPACKer

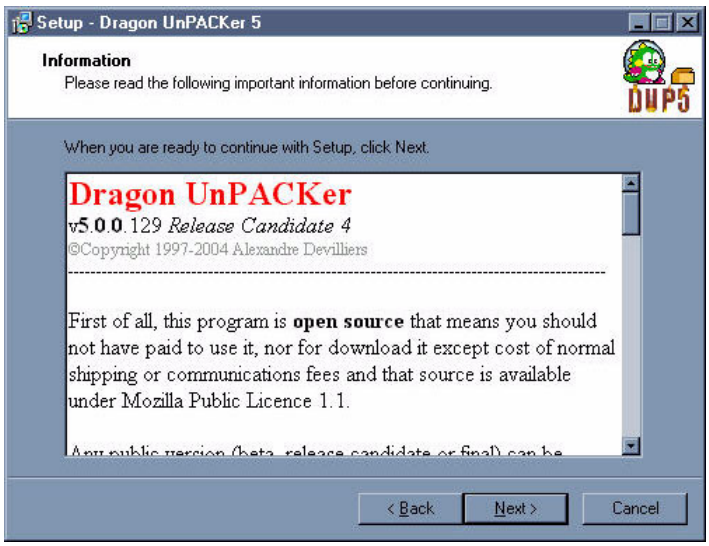
1. Run the file *setup.exe*.
2. **Select Setup Language** appears.

On **Select Setup Language**, choose the language you want to use with DragonUnPACKer and click **OK**.

3. **Setup** appears.

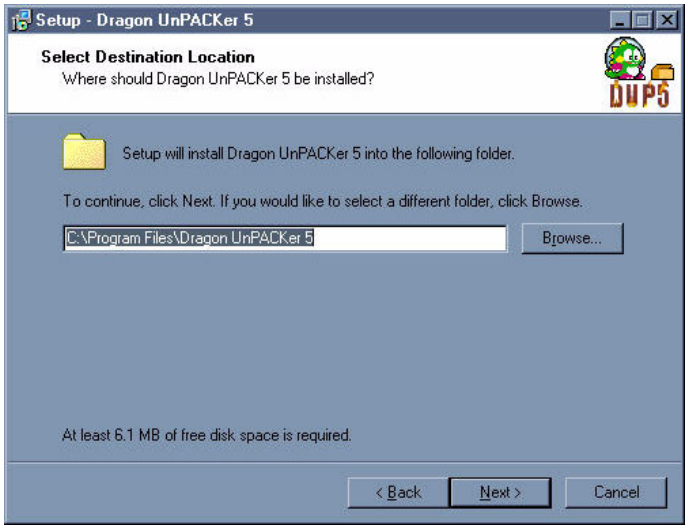
Click **Next**.

4. **Information** appears.



Read all the information and click **Next** if you agree with it.

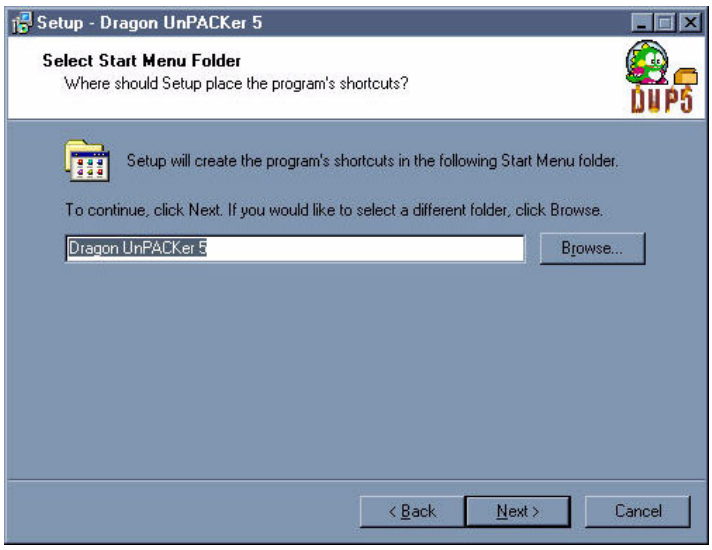
5. **Select Destination Location** appears.



Click **Next** to accept the default installation location and continue with installing the program.

Click **Browse** to open a file requestor and select a different installation location, then click **Next** to continue installing the program

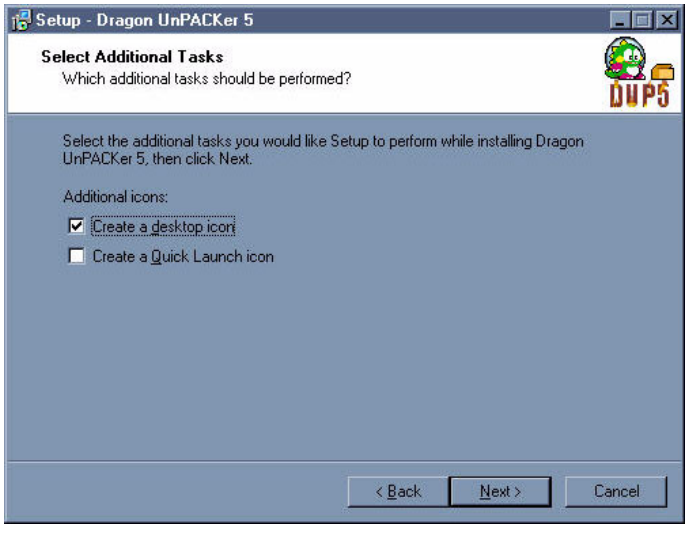
6. **Select Start Menu** appears.



Click **Next** to accept the default start menu folder location and continue with installing the program.

Click **Browse** to open a file requestor and select a different start menu folder location, then click **Next** to continue installing the program

7. **Select Additional Tasks** appears.

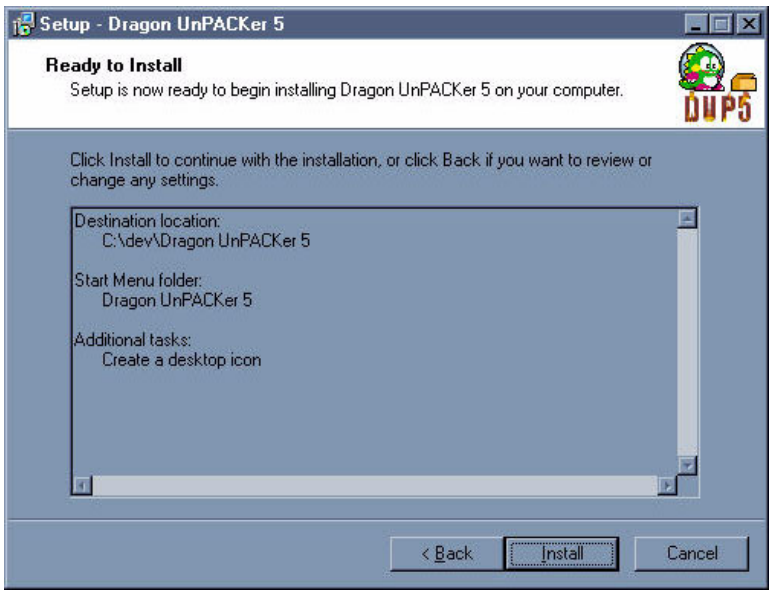


Select **Create a desktop icon** if you want the install program to create an icon for DragonUnPACKer on your Windows desktop.

Select **Create a Quick Launch icon** if you want the install program to create an icon for DragonUnPACKer on your Quick Launch bar.

When you have selected any options you want, click **Next**.

8. **Ready to Install** appears. The installation information you have entered so far is summarized.



If you are satisfied with the summarized information, click **Next**.

If you are not satisfied with the summarized information, click **Back** until you are at the installation step where you want to change information. Change the information there, then click **Next** until you are back at this screen.

9. The installation program begins installing DragonUnPACKer. When the installation is finished, **Setup** appears.

Click **Finish**. DragonUnPACKer is now installed on your system.
